Notes to the Financial Statements for the year ended 30 June 2018

Note 12. Provisions (continued)

Provisions for close-down and restoration, and environmental clean-up costs - tips and quarries

Restoration

Close down and restoration costs include the dismantling and demolition of infrastructure and the removal of residual materials and remediation of disturbed areas. Estimated close down and restoration costs are provided for in the accounting period when the obligation arising from the related disturbance occurs, whether this occurs during the development or during the operation phase, based on the net present value of estimated future costs.

Provisions for close down and restoration costs do not include any additional obligations which are expected to arise from future disturbance. The costs are estimated on the basis of a closure plan. The cost estimates are calculated annually during the life of the operation to reflect known developments, eg updated cost estimates and revisions to the estimated lives of operations, and are subject to formal review at regular intervals

Rehabilitation

Where rehabilitation is conducted systematically over the life of the operation, rather than at the time of closure, provision is made for the estimated outstanding continuous rehabilitation work at each reporting date and the cost is charged to the Income Statement.

Provision is made for the estimated present value of the costs of environmental clean up obligations outstanding at the reporting date. These costs are charged to the Income Statement. Movements in the environmental clean up provisions are presented as an operating cost, except for the unwinding of the discount which is shown as a borrowing cost.

Remediation procedures generally commence soon after the time the damage, remediation process and estimated remediation costs become known, but may continue for many years depending on the nature of the disturbance and the remediation techniques.

As noted above, the ultimate cost of environmental remediation is uncertain and cost estimates can vary in response to many factors including changes to the relevant legal requirements, the emergence of new restoration techniques or experience at other locations. The expected timing of expenditure can also change, for example in response to changes in quarry reserves or production rates. As a result there could be significant adjustments to the provision for close down and restoration and environmental clean up, which would affect future financial results.

Other movements in the provisions for close down and restoration costs, including those resulting from new disturbance, updated cost estimates, changes to the estimated lives of operations and revisions to discount rates are capitalised within property, plant and equipment. These costs are then depreciated over the lives of the assets to which they relate.

Close down and restoration costs are a normal consequence of tip and quarry operations, and the majority of close down and restoration expenditure is incurred at the end of the life of the operations. Although the ultimate cost to be incurred is uncertain, Council estimates the respective costs based on feasibility and engineering studies using current restoration standards and techniques.

Notes to the Financial Statements for the year ended 30 June 2018

Note 13. Accumulated surplus, revaluation reserves, changes in accounting policies, changes in accounting estimates and errors

(a) Nature and purpose of reserves

Infrastructure, property, plant and equipment revaluation reserve

The infrastructure, property, plant and equipment revaluation reserve is used to record increments / decrements of non-current asset values due to their revaluation.

Accounting policy for joint arrangements

The Council has determined that it has joint ventures only

Joint ventures

Interests in joint ventures are accounted for using the equity method in accordance with AASB128 Investments in *Associates and Joint Ventures*. Under this method, the investment is initially recognised as a cost and the carrying 'amount is increased or decreased to recognise the Council's share of the profit or loss and other comprehensive income of the joint venture after the date of acquisition.

If the Council's share of losses of a joint venture equals or exceeds its interest in the joint venture, the Council discontinues recognising its share of further losses.

The Council's share in the joint venture's gains or losses arising from transactions between itself and its joint venture are eliminated.

Adjustments are made to the joint venture's accounting policies where they are different from those of the Council for the purpose of the consolidated financial statements.

	Total non-cancellable operating lease commitments	98	

b. Non-cancellable operating leases include the following assets:

Computer servers, photocopy machines

Conditions relating to operating leases:

- All operating lease agreements are secured only against the leased asset.
- No lease agreements impose any financial restrictions on Council regarding future debt etc.

Notes to the Financial Statements for the year ended 30 June 2018

Note 17. Contingencies and other liabilities/assets not recognised

The following assets and liabilities do not qualify for recognition in the Statement of Financial Position, but their knowledge and disclosure is considered relevant to the users of Council's financial report.

LIABILITIES NOT RECOGNISED:

1. Guarantees

(i) Defined benefit superannuation contribution plans

Council participates in an employer-sponsored defined benefit superannuation scheme and makes contributions as determined by the superannuation scheme's trustees.

Member councils bear responsibility of ensuring there are sufficient funds available to pay out the required benefits as they fall due.

While the scheme's most recent full actuarial review indicated that the net assets of the scheme were sufficient to meet the accrued benefits of the scheme's defined benefit member category, member councils are required to make contributions in future years where the scheme goes into deficit (as has occurred in previous years).

The Local Government Superannuation Scheme however is unable to provide Council with an accurate estimate of any share of the net deficit and accordingly Council has not recorded any net liability from its defined benefit scheme obligations in accordance with AASB 119.

Future planned contributions being made to the defined benefit scheme to rectify past (and projected) deficit positions will be recognised as an expense when they become payable – similar to the accounting for defined contributions plans.

Member councils are treated as Pooled Employers for the purposes of AASB119. Pooled Employers are required to pay standard employer contributions and additional lump sum contributions to the Fund.

The standard employer contributions were determined using the new entrant rate method under which a contribution rate sufficient to fund the total benefits over the working life-time of a typical new entrant is calculated. The current standard employer contribution rates are:

Division B 1.9 times employee contributions

Division C 2.5% salaries

Division D 1.64 times employee contributions

The additional lump sum contribution for each Pooled Employer is a share of the total additional contributions of \$40.0 million per annum from 1 July 2017 for 4 years to 30 June 2021, apportioned according to each employer's share of the accured liabilities as at 30 June 2017. These additional lump sum contributions are used to fund the defecit of assets to accrued liabilities as 30 June 2017.

The adequacy of contributions is assessed at each triennial actuarial investigatoin and monitored annually between triennials.

As stated above, each sponsoring employer is exposed to the actuarial risks associated with current and former employees of other sponsoring employers and hence shares in the associated gains and losses.

Notes to the Financial Statements for the year ended 30 June 2018

Note 17. Contingencies and other liabilities/assets not recognised (continued)

LIABILITIES NOT RECOGNISED (continued):

- 1. Guarantees (continued)
- (i) Defined benefit superannuation contribution plans (continued)

However, there is no relief under the Fund's trust deed for employers to walk away from their defined benefit obligations. Under limited circumstances, an employer may withdraw from the plan when there are no active members, on full payment of outstanding additional contributions. There is no provision for allocation of any surplus which may be present at the date of withdrawal of the entity.

There are no specific provisions under the Fund's trust deed dealing with deficits or suplus on wind-up.

There is no provision for the allocation of any surplus which may be present at the date of withdrawal of an employer.

The plan is a defined benefit plan. However, each sponsoring employer is exposed to the actuarial risks associated with current and former employees of other sponsoring employers and hence shares in the associated gains and losses (to the extent that they are not bourne by members). As such, there is not sufficient reliable information to allow each sponsoring employer to account for its proportionate share of the defined benefit obligation, sub-group assets and costs associated with the sub-group in the same way as it would for a single employer sponsored defined benefit plan.

The amount of Council employer contributions to the defined benefit section of the Fund and recognised as an expense and disclosed as part of superannuation expenses at Note 4 (a) for the year ending 30 June 2018 was \$ 155,268.09.

The last valuation of the Fund was by the Actuary, Mr Richard Boyfield, FIAA on 12 December 2017, relating to the period ended 30 June 2017.

Council's expected contributions to the Fund for the next annual reporting period is \$ 161,648.64.

The estimated employer reserves financial position for the Pooled Employers at 30 June 2018 is:

Employer reserves only *	\$ millions	Asset Coverage
Assets	1,817.8	
Past Service Liabilities	1,787.5	101.7%
Vested Benefits	1,778.0	102.2%

^{*} excluding member accounts and reserves in both assets and liabilites.

The key economic long term assumptions used to calculate the present value of accrued benefits are:

Investment return	6.0% per annum
Salary inflation *	3.5% per annum
Increase in CPI	2.5% per annum

^{*} Plus promotional increases

Notes to the Financial Statements for the year ended 30 June 2018

Note 17. Contingencies and other liabilities/assets not recognised (continued)

LIABILITIES NOT RECOGNISED (continued):

1. Guarantees (continued)

(i) Defined benefit superannuation contribution plans (continued)

The contribution requirements may vary from the current rates if the overall sub-group experience is not in line with the actuarial assumptions in determining the funding program, however any adjustment to the funding program would be the same for all sponsoring employers in the Pooled Employers group.

Please note that the estimated employer reserves financial position above is a preliminary calculation and once all the relevant information has been received by the Funds Actuary, the 2018 triennial review will be completed around December 2018.

Council's additional lump sum contribution is around 0.22% of the total additional lump sum contributions for all Pooled Employers (of \$40m each year from 1 July 2017 to 30 June 2021) provides an indication of the level of participation of Council compared with other employers in the Pooled Employer sub-group.

(ii) Statewide Limited

Council is a member of Statewide Mutual, a mutual pool scheme providing liability insurance to local government.

Membership includes the potential to share in either the net assets or liabilities of the fund depending on its past performance. Council's share of the net assets or liabilities reflects Council's contributions to the pool and the result of insurance claims within each of the fund years.

The future realisation and finalisation of claims incurred but not reported to 30/6 this year may result in future liabilities or benefits as a result of past events that Council will be required to fund or share in respectively.

(iii) StateCover Limited

Council is a member of StateCover Mutual Limited and holds a partly paid share in the entity.

StateCover is a company providing workers compensation insurance cover to the NSW local government industry and specifically Council.

Notes to the Financial Statements for the year ended 30 June 2018

Note 17. Contingencies and other liabilities/assets not recognised (continued)

LIABILITIES NOT RECOGNISED (continued):

1. Guarantees (continued)

(iii) StateCover Limited (continued)

Council has a contingent liability to contribute further equity in the event of the erosion of the company's capital base as a result of the company's past performance and/or claims experience or as a result of any increased prudential requirements from APRA.

These future equity contributions would be required to maintain the company's minimum level of net assets in accordance with its licence requirements.

(iv) Other guarantees

Council has provided no other guarantees other than those listed above.

2. Other liabilities

(i) Third party claims

The Council is involved from time to time in various claims incidental to the ordinary course of business including claims for damages relating to its services.

Council believes that it is appropriately covered for all claims through its insurance coverage and does not expect any material liabilities to eventuate.

(ii) Potential land acquisitions due to planning restrictions imposed by Council

Council has classified a number of privately owned land parcels as local open space or bushland.

As a result, where notified in writing by the various owners, Council will be required to purchase these land parcels.

At reporting date, reliable estimates as to the value of any potential liability (and subsequent land asset) from such potential acquisitions has not been possible.

(iii) Potential liability relating to the TRRRC development

Council is currently engaged in the construction of the Three Rivers Regional Retirement Community.

The construction contract for this work was terminated on 2 August 2018.

This action may lead to a future liability which at this stage is unable to be determined.

Notes to the Financial Statements for the year ended 30 June 2018

Note 17. Contingencies and other liabilities/assets not recognised (continued)

ASSETS NOT RECOGNISED:

(i) Infringement notices/fines

Fines and penalty income, the result of Council issuing infringement notices is followed up and collected by the Infringement Processing Bureau.

Council's revenue recognition policy for such income is to account for it as revenue on receipt.

Accordingly, at year end, there is a potential asset due to Council representing issued but unpaid infringement notices.

Due to the limited information available on the status, value and duration of outstanding notices, Council is unable to determine the value of outstanding income.

(ii) Share in Southern Phones

Warrumbungle holds a share in Southern Phones which was acquired for a nominal amount. Council is seeking a current valuation of this asset for recognition purposes. When this valuation is acquired this asset will be recognised at fair value.

Notes to the Financial Statements for the year ended 30 June 2018

Note 18. Financial risk management

\$ '000

Risk management

Council's activities expose it to a variety of financial risks including (1) price risk, (2) credit risk, (3) liquidity risk and (4) interest rate risk.

The Council's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Council.

Council does not engage in transactions expressed in foreign currencies and is therefore not subject to foreign currency risk.

Financial risk management is carried out by Council's finance section under policies approved by the Council.

The fair value of Council's financial assets and financial liabilities approximates their carrying amount.

Council's objective is to maximise its return on cash and investments whilst maintaining an adequate level of liquidity and preserving capital.

Council's finance area manages the cash and Investments portfolio with the assistance of independent advisors.

Council has an investment policy which complies with the *Local Government Act 1993* and Ministerial Investment Order 625. This policy is regularly reviewed by Council and its staff and a monthly Investment report is provided to Council setting out the make-up and performance of the portfolio as required by Local Government regulations.

The risks associated with the investments held are:

- Price risk the risk that the capital value of Investments may fluctuate due to changes in market prices, whether there changes are caused by factors specific to individual financial instruments or their issuers or are caused by factors affecting similar instruments traded in a market.
- Interest rate risk the risk that movements in interest rates could affect returns and income.
- Credit risk the risk that the investment counterparty will not complete their obligations particular to a
 financial instrument, resulting in a financial loss to Council be it of a capital or income nature.

Council manages these risks (amongst other measures) by diversifying its portfolio and only purchasing investments with high credit ratings or capital guarantees.

Council also seeks advice from independent advisers before placing any funds in cash equivalents and investments.

(a) Market risk – price risk and interest rate risk

The following represents a summary of the sensitivity of Council's Income Statement and accumulated surplus (for the reporting period) due to a change in the interest rates applicable.

It is assumed that the change in interest rates would have been constant throughout the reporting period.

	Increase of val	ues/rates	Decrease of values/rates	
2018	Profit	Equity	Profit	Equity
Possible impact of a 1% movement in interest rates	170	170	(170)	(170)
2017				
Possible impact of a 1% movement in interest rates	183	183	(183)	(183)

Notes to the Financial Statements for the year ended 30 June 2018

Note 18. Financial risk management (continued)

\$ '000

(b) Credit risk

Council's major receivables comprise (i) rates and annual charges and (ii) user charges and fees.

The major risk associated with these receivables is credit risk – the risk that debts due and payable to Council may not be repaid in full.

Council manages this risk by monitoring outstanding debt and employing stringent debt recovery procedures. It also encourages ratepayers to pay their rates by the due date through incentives.

Credit risk on rates and annual charges is minimised by the ability of Council to secure a charge over the land relating to the debts – that is, the land can be sold to recover the debt. Council is also able to charge interest on overdue rates and annual charges at higher than market rates which further encourages the payment of debt.

There are no significant concentrations of credit risk, whether through exposure to individual customers, specific industry sectors and/or regions.

Council makes suitable provision for doubtful receivables as required and carries out credit checks on most non-rate debtors.

There are no material receivables that have been subjected to a re-negotiation of repayment terms.

A profile of Council's receivables credit risk at balance date follows:

	2018	2018	2017	2017
	Rates and		Rates and	
	annual	Other	annual	Other
	charges	receivables	charges	receivables

> 91 days overdue			197	165
			5,391	4,266

Notes to the Financial Statements for the year ended 30 June 2018

Note 18. Financial risk management (continued)

\$ '000

(c) Liquidity risk

Payables and borrowings are both subject to liquidity risk – the risk that insufficient funds may be on hand to meet payment obligations as and when they fall due.

Council manages this risk by monitoring its cash flow requirements and liquidity levels and maintaining an adequate cash buffer.

Payment terms can (in extenuating circumstances) also be extended and overdraft facilities utilised as required.

Borrowings are also subject to interest rate risk – the risk that movements in interest rates could adversely affect funding costs and debt servicing requirements. Council manages this risk by borrowing long term and fixing the interest rate on a 4-year renewal basis. The Finance Section regularly reviews interest rate movements to determine if it would be advantageous to refinance or renegotiate part or all of the loan portfolio.

The contractual undiscounted cash outflows (ie. principal and interest) of Council's payables and borrowings are set out in the maturity table below:

\$ '000	Weighted	Subject				Total	Actual
	average	to no		payable in:		cash	carrying
	interest rate	maturity	≤ 1 Year	1 – 5 Years	> 5 Years	outflows	values

Notes to the Financial Statements for the year ended 30 June 2018

Note 19. Material budget variations

\$ '000

Council's original financial budget for 17/18 was adopted by the Council on 21 June 2018 and is not required to be audited.

While the Income Statement included in this General Purpose Financial Report must disclose the original budget adopted by Council, the *Local Government Act* 1993 requires Council to review its financial budget on a quarterly basis, so that it is able to manage the various variations between actuals versus budget that invariably occur throughout the year.

This note sets out the details of **material variations** between Council's original budget and its actual results for the year as per the Income Statement – even though such variations may have been adjusted for during each quarterly budget review.

Note that for variations* of budget to actual:

Material variations represent those variances that amount to 10% or more of the original budgeted figure.

F = Favourable budget variation, U = Unfavourable budget variation

Note 20. Fair value measurement

\$ '000

The Council measures the following asset and liability classes at fair value on a recurring basis:

- Infrastructure, property, plant and equipment

The fair value of assets and liabilities must be estimated in accordance with various accounting standards for either recognition and measurement requirements or for disclosure purposes.

AASB 13 Fair Value Measurement requires all assets and liabilities measured at fair value to be assigned to a 'level' in the fair value hierarchy as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

(1) The following table presents all assets and liabilities that have been measured and recognised at fair values:

		Fair value n	neasuremen	t hierarchy	
2018		Level 1	Level 2	Level 3	Total

(2) Transfers between levels of fair value hierarchies

During the year, there were no transfers between level 1 and level 2 fair value hierarchies for recurring fair value measurements.

The following transfers occurred between level 3 and level 2 fair value hierarchies during the year:

		Fa	ir value hier	archy transfe	rs
	Details	20	18	20	17
		Level 2	Level 3	Level 2	Level 3
		Quoted	Significant	Quoted	Significant
		prices in	observable	prices in	observable
Infrastructure, property, plant and equipment		active mkts	inputs	active mkts	inputs
Land – Community	20 (1)	74	(74)	_	_
Land - Operational	20 (1)	2,721	(2,721)	_	_
Total infrastructure, property, plant and equipm	nent	2,795	(2,795)		_

Council's policy for determining transfers between fair value hierarchies which have occurred is:

- at the end of the reporting period.

Some operation and community land have been transferred from level 3 inputs to level 2 inputs as part of the revaluation by Asset Val in 2017/18.

Notes to the Financial Statements

for the year ended 30 June 2018

Note 20. Fair value measurement (continued)

(3) Valuation techniques used to derive level 2 and level 3 fair values

Where Council is unable to derive fair valuations using quoted market prices of identical assets (ie. level 1 inputs), Council instead utilises a spread of both observable inputs (level 2 inputs) and unobservable inputs (level 3 inputs).

The fair valuation techniques Council has employed while utilising level 2 and level 3 inputs are as follows:

Infrastructure, property, plant and equipment

Plant and equipment, office equipment and furniture, fixtures and fittings

Plant and equipment, office equipment and furniture, and fixtures and fittings are all valued at depreciated cost (original purchase price) as this assessment is considered to approximate fair value.

Roads, bulk earthworks, bridges, footpaths and stormwater drainage

The values currently displayed are based on the following:

are componentised into road pavement and road seal assets and differentiated between long and short life components, with pavements split into sealed and unsealed road The current replacement cost for these asset classes has been derived from a 2014/15 valuation survey undertaken, for this purpose, by APV Valuers. Roads pavements. A distinction is also made between road pavements on various soil types.

Bridges are componentised into bridges Long Life and Short Life and major culverts, and culverts and drainage assets include both pits and pipes. All asset components are information on its road network, but still lacks some historical information such as rehabilitation dates for components such as road seals and pavements, and is in the final assigned long and short life components and useful lives and are condition rated at the time of valuation. Council has increased significantly the amount of available processes of segmenting its local road network. Other information that is currently being sourced includes traffic volumes, more accurate dimensions and topography information, and better information on soil types.

Quarry and tip remediation liabilities

life. Estimated remediation costs are based on engineering assessments and take into account the inputs needed to rehabilitate the quarry/tip sites. As the final remediation will not happen for several years the input costs are indexed out to the estimated remediation date through the use of CPI, and then discounted back to arrive at the present Council recognises remediation assets for quarries and tips under its control. These assets are based on the estimated cost to remediate the sites at the end of their useful value, with the discount rate being the ten year government bond rate. No estimate is made for potential increases in rehabilitation scope in future years as such changes can not be reliably measured. Further details on these assets can be found in note 26 and note 9.

Operational and community land

settling the price. These elements include: land description and dimensions, planning and other constraints on development and the potential for alternative use. Operational land by Assetval in 2017/18 using observable inputs (level 2 inputs) while the majority is previously valued at Valuer General unimproved capital value (UCV) which takes into account has been valued by Assetval in 2017/18 using a spread of both observable inputs (level 2 inputs) and unobservable inputs (level 3 inputs). For community land, some are valued Land has been valued at market value, having regard to the "highest and best use", after identifying elements that would be taken into account by buyers and sellers in highest and best use values.

Notes to the Financial Statements

for the year ended 30 June 2018

Note 20. Fair value measurement (continued)

Other structures and land improvements (depreciable)

This asset class includes Aerodromes, Pools, landscaping, gardens, sport change rooms, grand stands etc., Major components include pool structures, walls, roofs, pumps, The value of structures and depreciable land improvements have been assessed on the basis of replacement with a new asset having similar service potential and includes fences, sheds, garden beds etc. Each component is assigned a useful life and long life component, based on engineering estimates and are condition rated at the time of valuation. In some cases Council has limited data for this asset class in relation to original construction date, age, and past maintenance and renewals history. allowances for preliminaries and professional fees. These values have been derived from a valuation by Australis Asset Advisory Group for 30/6/2016.

Water and sewer network

useful life and remaining useful life, and were condition rated at time of revaluation, with the condition rating determining the remaining useful life. Valuations require a level of In other years current replacement costs for water and sewer assets have been derived by Modern Engineering Equivalent Replacement Asset (MEERA) unit costs and lump professional judgement from both the valuer and Council engineers and the valuation was carried out through the use of condition assessments including through the use of Water and sewer assets are componentised into mains, treatment plants, pumping stations, and reservoirs. All asset components are assigned a long life component, cameras and maintenance/break histories for assets that could not be accessed through a simple inspection. Limitation on current valuations include further data issues This asset class is currently undergoing a valuation being conducted externally by Australis Asset Advisory Group. around Council mains break historical data, and a lack of long term historical data on renewals.

Buildings

Buildings are valued by applying a unit rate to a structure or a square metre rate to a building, based on its current replacement cost. These rates are derived from substantial componentised into Super structure, Sub structure, Finishes, Fittings and Services. Each component is assigned a useful life and remaining useful life with the remaining useful life based on the condition assessment at the time of valuation. Further improvements to the valuation could be achieved analysis of construction costs from over 120 Councils across NSW by Council's valuer (Valued by Assetval in 2017/18). Buildings assets are with further details on the level of componentisation, as well as more in-depth maintenance history.

Notes to the Financial Statements

for the year ended 30 June 2018

Note 20. Fair value measurement (continued)

\$,000

(4). Fair value measurements using significant unobservable inputs (level 3) (continued)

c. The valuation process for level 3 fair value measurements

Warrumbungle Shire Council undertakes to recognise it's assets at fair value. Whilst this method does not suit some asset categories such as Plant & Equipment or Office furniture it is the best available method to determine the value of assets such as roads and buildings.

The process by council determines is through:

- * A re examination of the fair value of the relevant asset classes as specified by the OLG on a five year rotation;
- * Seek an external valuer with good knowledge and reputation to undertake the valuation;
- * The "Valuer" selects a sample of assets and in conjunction with Council Staff will then examine the sample to determine any adjustments required;
 - * During this process the adequacy and accuracy of costing and usage assumptions are analysed and addressed as required;
 - * After the physical examination the Valuer goes over the findings with Council and invites questions and feedback;
 - * In conjunction with Council's input the Valuer will then make a determination on which Council will act.

(5). Highest and best use

All of Council's non-financial assets are considered to being utilised for their highest and best use.

Notes to the Financial Statements for the year ended 30 June 2018

Note 21. Related party transactions

\$,000

a. Key management personnel

Key management personnel (KMP) of the Council are those persons having the authority and responsibility for planning, directing and controlling the activities of the council, directly or indirectly.

The aggregate amount of KMP compensation included in the Income Statement is:

2018 2017	1,150 809	87 86	1,237 895
Compensation:	Short-term benefits	Superannuation	Total

b. Other transactions with KMP and their related parties

Council has determined that transactions at arm's length between KMP and Council as part of Council delivering a public service objective (e.g. access to library or Council swimming pool by KMP) will not be disclosed.

Notes to the Financial Statements

for the year ended 30 June 2018

Note 22. Statement of developer contributions

\$,000

Under the Environmental Planning and Assessment Act 1979, Council has significant obligations to provide Section 7.11 (contributions towards provision or improvement of amenities or services) infrastructure in new release areas. It is possible that the funds contributed may be less than the cost of this infrastructure, requiring Council to borrow or use general revenue to fund the difference.

Notes to the Financial Statements for the year ended 30 June 2018

Note 24(c). Statement of performance measures – consolidated results (graphs)

Purpose of operating performance ratio

This ratio measures
Council's
achievement of
containing operating
expenditure within
operating revenue.

Commentary on 2017/18 result

2017/18 ratio -8.10%

This ratio has dramatically since last year.

This is due to a combination of the early payment of the FAG's last year coupled with high Capital Purpose Grants.

Benchmark

Minimum >=0.00%

Source for benchmark: Code of Accounting Practice and Financial Reporting #26

Ratio achieves benchmark Ratio is outside benchmark

Purpose of own source operating revenue ratio

This ratio measures fiscal flexibility. It is the degree of reliance on external funding sources such as operating grants and contributions.

Commentary on 2017/18 result

2017/18 ratio 47.40%

This ratio, whilst important, by its nature will worsen as a council recieves more grant monies. Ironically it has been Council's success in attracting Grant monies that is reflected in this result.

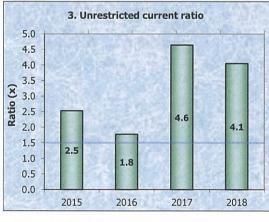

Benchmark:

Minimum >=60.00%

Source for benchmark: Code of Accounting Practice and Financial Reporting #26

Ratio achieves benchmark
Ratio is outside benchmark

Purpose of unrestricted current ratio

To assess the adequacy of working capital and its ability to satisfy obligations in the short term for the unrestricted activities of Council.

Commentary on 2017/18 result

2017/18 ratio 4.05x

This ratio is well the benchmark. The 2017 spike was due to the initial prepayment of FAG's in that year. This will ultimately see a down spike when the prepayment is stopped.

Benchmark:

Minimum >=1.50

Source for benchmark: Code of Accounting Practice and Financial Reporting #26

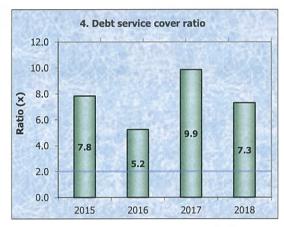

Ratio achieves benchmark Ratio is outside benchmark

Notes to the Financial Statements

for the year ended 30 June 2018

Note 24(c). Statement of performance measures – consolidated results (graphs)

Purpose of debt service cover ratio

This ratio measures the availability of operating cash to service debt including interest, principal and lease payments

Commentary on 2017/18 result

2017/18 ratio 7.30x

This ratio is well above the OLG benchmark and reflects Council's commitment to use debt only as required and without reliance.

Benchmark:

Minimum >=2.00

Source for benchmark: Code of Accounting Practice and Financial Reporting #26

Ratio achieves benchmark Ratio is outside benchmark

Purpose of rates and annual charges outstanding ratio

To assess the impact of uncollected rates and annual charges on Council's liquidity and the adequacy of recovery efforts.

Commentary on 2017/18 result

2017/18 ratio 8.68%

Changed Debt collection process has seen this ratio increase.

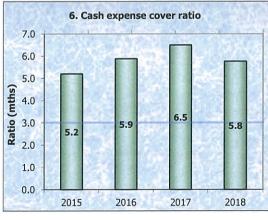

Maximum <10.00%

Ratio is outside Benchmark

Purpose of cash expense cover ratio

This liquidity ratio indicates the number of months a Council can continue paying for its immediate expenses without additional cash inflow.

Commentary on 2017/18 result

2017/18 ratio 5.76 mths

Well above the OLG benchmark but a slight drop on last year which was high due to the initial FAG's prepayment.

Benchmark: -

Minimum >=3.00

Source for benchmark: Code of Accounting Practice and Financial Reporting #26
