Additional Information

An application for a Domestic Oil or Solid Fuel Heating Appliance shall be accompanied by the following information:

- Manufacturers details of the proposed heating appliance showing installation methods and compliance with AS/NZS 2918:2018 – (Domestic solid fuel burning appliances – Installation).
- A floor plan and elevation of the building showing the position of the heating appliance and penetration of the chimney / flue.
- A site plan, to scale, showing the location of the chimney / flue and any buildings, facilities and any environmentally sensitive areas on adjacent land to the site.
- Details of the topography on adjacent land to the site related to the chimney / flue of the heating appliance and an assessment of the site in light of those details.
- Details of any other factors relevant to the capacity of the facility.

NB: Failure to provide the information required by this application may result in Council being unable to properly assess your proposal and delay the approval process.

Plan details Please detail the location of flue on roof and the distance of the top of the flue to neighbouring home(s) (if on a significant slope please also provide a cross-sectional plan of flue in relation to neighbouring residences).
