7. Spraying on the road verges within the town as the grass is growing through the road and is lifting and damaging the asphalt.

9. Can we have the concrete surround that is current around the tree outside Mechanics Hall refurbished...i.e. demolish existing damaged one and install one with a wider diameter (due to the tree having grown and has lifted and broken the concrete surround?)
10. Storm water drainage system, where is it meant to drain away too? And is there a chance for a review of the storm water drainage system to ensure excess water is able to drain away.
